Polycom CX5000 from TELUS

Immersive meetings with one-of-a-kind Webcam.

TELUS – Canada’s leader in conferencing solutions.

TELUS offers a complete suite of conferencing services – audio, video, public rooms, events, Web casting and streaming media, audio-visual and video conferencing equipment sales, engineering design, management and maintenance services. TELUS is the top choice for Canadian organizations because we have:

- Expertise in IP, ISDN and seamlessly integrating solutions into complex customer networks
- National certification with leading vendors including Polycom, TANDBERG, Cisco, Extron, Crestron, Barco, Mitsubishi, Samsung, Sony, PolyVision
- Successes and experience in all vertical markets
- Consulting services to support room design and to ensure effective solutions across Canada
- Choice of fully managed or on-demand products and services
- Solutions to enhance your CX5000 conference rooms for a real “face-to-face” experience

Panoramic view; automatic focus on the speaker.

Organizations have a new option for gathering together far-flung team members for a quick meeting: Polycom® CX5000. This audio/video tabletop device gives remote participants a 360-degree panoramic view of the conference room, enhanced audio, and video that tracks the flow of conversation. It delivers a unique and immersive meeting experience in which participants in different locations can easily converse and share information as though they were in the same room.

This is a one-of-a-kind meeting room Webcam. Polycom CX5000 covers every view of your meeting room using a set of five high-resolution video cameras. Tied to the cameras are six directional microphones. The system switches automatically to focus on the individual who is currently speaking. Audio technology filters out background noise to better capture conversations. CX5000 can also be used as a standalone, audio-only PSTN (public switched telephone network) speakerphone.

Hosting a meeting using Polycom CX5000 is as simple as plugging the device into a computer with access to Microsoft® Office Communications Server 2007 or Microsoft® Office Live Meeting 2007. You can immediately use your CX5000 when you purchase Microsoft Office Live Meeting 2007 from TELUS. Our video conferencing professionals can help you configure your meeting room to enhance your CX5000 experience.

CX5000

Fully engage all participants.

- 360-degree panoramic video of everyone at the table
- Video automatically tracks active speaker
- Adds video conferencing to Live Meeting and Office Communication Server 2007 web conferencing
- PSTN interface for basic speakerphone
- USB interface for VoIP and video

Make collaboration easy and affordable.

- Deploy and use CX5000 with little or no training
- No additional video equipment required

Transform meetings in corporate assets.

- Adds video to Live Meeting and OCS web conference recordings
- Recording's video, audio and web content all synchronized
- Recordings are VCR-control-enabled

Collaboration Services,
Business. Backed by TELUS.

Polycom CX5000 from TELUS

Polycom CX5000 is one of a comprehensive suite of conferencing solutions provided by TELUS. If your organization requires broadcast-quality video conferencing, TELUS also offers other solutions to fit your unique meeting room environments. Discuss your needs with us – TELUS has more than 16 years experience in conferencing system design, installation, support, hosting, management, operation and network transport. With TELUS Conferencing Solutions, you can conduct regularly scheduled and spontaneous meetings using the phone, video, the Web, or all three. It's secure, reliable and available 24/7.

Collaborative, engaging meetings.

With Polycom CX5000, co-workers, clients and partners in different locations interact easily and efficiently. Your meetings will be more collaborative and engaging because CX5000 can:

- **Make collaboration easy.** The intuitive design and USB plug-and-play functionality makes CX5000 easy to set up and use. Little or no training is required. Remote participants do not require additional equipment – just a computer with a network connection.
- **Fully engage all participants.** Remote users can see the entire conference room, which allows better insight into meeting dynamics because they can see the non-verbal communication. Advanced technology automatically changes the camera view so that the active speaker can always be identified, allowing participants to easily track the flow of conversation. Conference participants can integrate virtual presentations, share whiteboards and transfer files because CX5000 works in conjunction with Office Communications Server 2007 and Office Live Meeting 2007. Deploy your CX5000 in conference rooms configured to enhance your meeting experience. TELUS can recommend a number of solutions with single or multiple displays to give both local and remote participants the feeling of “being there”.
- **Transform meetings into corporate assets.** Meetings that use CX5000 can easily be recorded. Those who review the recording will see not only the meeting content and video of the active speaker, but also the panoramic video of everyone in the conference room. The recorded audio and video is synchronized with all meeting content, so users can quickly fast-forward or rewind to review the most relevant sections of the meeting.

Requirements

- Office Communications Server 2007 or Office Live Meeting 2007 environment
- Microsoft Windows® XP, 32-bit with service pack 2 (SP2) or later, or Windows Vista, 32- or 64-bit
