

TELUS security solutions

The TELUS difference

TELUS delivers increased compliance, enhanced risk management and improved customer trust to clients with complex information security needs.

reasons to choose TELUS:

- The most comprehensive security portfolio including consulting and managed solutions, technology resale and implementation, plus security research services and partnerships with 16 of the top 20 global security vendors
- TELUS Security Labs – with a staff of 30 researchers and a \$3 million budget – is a leading provider of security research to over 50 of the world's top security product vendors
- One of the largest security organizations in Canada backed by a 24/7 security operations centre, flexible service level agreements, plus national sales, presales and delivery resources

portfolio snapshot

- **Professional services:**
 - Governance, risk and compliance consulting
 - Software security testing, training and development
 - Business continuity planning/disaster recovery planning
 - Infrastructure security testing
- **Managed security solutions:**
 - Firewall, VPN and secure authentication
 - Intrusion prevention
 - Email and web content security
 - Log retention and analysis
- **Integrated security solutions:**
 - Resale partnerships with over 30 security technology vendors
 - National presales and delivery capabilities

business benefits

- **Boost productivity:** Minimize downtime from security breaches to enable IT staff to focus on priorities other than continual updates of security infrastructure
- **Improve compliance:** Efficiently manage risk through a balance of technology, people and processes to help avoid financial/corporate penalties
- **Benchmark security:** Ensure your business is secure enough by comparing your security posture to your compliance mandate and threat landscape
- **Strengthen brand loyalty:** Heighten information security to increase customer trust and brand protection
